

Kangaroo Surgical Case Cart

website: www.surgicalcasecarts.org

- ⇒ deploy ergonomically compliant Closed Case Carts
- ⇒ maintain and distribute high density shelving
- ⇒ decrease the Surgical Case Cart holding area by > 80%
- ⇒ move large Case Cart quantities in a single motion
- ⇒ reduce the costly repetitive handling of supply items

K-Push-in Shelves® are transferred from the Kangaroo Carts with the time and effort needed to move a single supply item.

K-Transfer Carts® 'lock' and 'release' with a single motion, for easy, safe and rapid transfer of shelving from the Kangaroo Cart to the 'Docking Station at the point-of-use. Multiple K-Transfer Carts can also be used as 'Case Cart Docking Stations' at the point-of-use.

K-Shelf Docking Stations® act as a holding station for the K-Push-in Shelves at the point-of-use. The Docking Station Can be hydraulically lowered to floor level, adapted with wheels to facilitate mobility, or integrated with a Case Cart ramp.
